DETAILED ACTION

Allowable Subject Matter

1. Claims 1-25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose applicant's claimed methodology particularly relating to a reduction of drain resistance of a drain extended MOS transistor in a semiconductor wafer, compared to prior art drain resistance.

Applicant's claimed methodology can be most readily distinguished from prior art by the limitations drawn to a creation of "doping concentration adjacent to a junction termination between first and second conductivity wells," formed by "implanting ions" "through a window" (of claimed extent) with the ions having an energy and dose to form the doping concentration adjacent the junction termination, but limited penetration through a thicker (i.e. second) insulator, in context of the written description and totality of claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evan Pert whose telephone number is 571-272-1969. The examiner can normally be reached on M-F (7:30AM-3:30 PM).
